

PRING overview

Document output plugin for kintone — October 2026

PRING is the kintone document plugin that uses Excel as it is.

No template rebuild. PDF and Excel straight from kintone records, with batch, scheduled and email delivery in one plugin.

500+ companies

worldwide, mainly Japan and Thailand
(cumulative since v1)

WHAT IT DOES

- **Your Excel assets just work** — Register the template instead of discarding it. Documents your teams already trust come out of kintone looking the same.
- **Formulas, pivots and formatting preserved** — SUM / VLOOKUP / IF recalculate after the merge; pivot tables, merged cells, conditional formatting and charts survive in the output.
- **Pricing unaffected by user count** — Pricing is per kintone domain. 100 or 1,000 users pay the same monthly fee; plans differ only by pages per month.
- **Batch, scheduler and email in one plugin** — Batch PDF from list views, scheduled output attached to kintone records, and email through your own mail server, without add-on products.

THREE STEPS

1. **Register the Excel template:** Upload the xlsx file you use today in the settings screen. No new editor to learn.
2. **Map cells to kintone fields:** "The recipient cell is the Customer field", and so on. The AI suggests mappings when field names are close.
3. **Export from the record view:** Press PDF or Excel on the record. Batch export from list views, or schedule regular runs.

PRICING

Plan	month (excl. tax)	pages / month
Lite	¥8,000	20,000 pages / month
Standard	¥15,000	50,000 pages / month
Pro	¥30,000	100,000 pages / month
Enterprise: custom quote		

- Every plan is priced independently of user count, with no setup fee.
- Overage: ¥5,000 per extra 10,000 pages, on top of the monthly fee and only beyond the included pages (added automatically, up to 5 blocks a month).
- Pages are counted per PDF page, and for Excel by the estimated printed page count (from the print area, paper size and scaling), per calendar month (JST).
- The free trial needs no credit card and never converts to a paid plan automatically.
- 7-day free trial (no credit card)

IN USE AT

- No credit card. Every feature free for 7 days
- TechJapan, the developer, has run kintone in-house since 2010
- Processed in Japan (Tokyo region). Generated documents are not stored; templates are isolated per customer
- Japanese, English and Thai. In Thailand, sold and supported by Fujifilm Business Innovation (Thailand)
